

# DARK ALLEY

A night shoot with flashlights. Handheld OR weapon mounted lights allowed.

Three targets with 2 shots to the body on each.

Your wife's little puppy got out of the house one night and you had to chase after it. It went down the alley. Three misguided youths, who were products of their society, stepped out of the shadows with the puppy. You felt sorry for them until they pulled knives and demanded your wallet. At that point you decided you would have to put them out of your misery.

You have to put two rounds in each body in a tactical manner and take the puppy back (OPTION: Shoot the target with the puppy in the head only with two rounds).
