

PARKING LOT HOSTAGE SHOOTOUT

You come across three bad guys holding three hostages in a parking lot. You have a concrete barricade in front of you. At the command you will load six rounds. At the buzzer you engage the bad guys with three shots, in tactical sequence, from the right side of the barricade. One shot on each. Then you engage the bad guys with three shots, in tactical sequence, from the left side, still using your strong hand, one shot on each.

DO NOT SWITCH HANDS.

Scoring will be IDPA, time and points down on the target. Not observing tactical sequence will cost you five points, and if you hit the hostage it will add 25 points. The above drawing is not to scale.

ALTERNATE SCENARIO: The above match is shot using your **NON-DOMINATE** hand.
