

SNUBBIE WITH RETENTION

This match is restricted to center-fire handguns with a maximum barrel length of 3". The intent is to practice with compact hideaway handguns.

The first target is at arm's length. The second target is approximately 7 to 8 yards distant. There are several non-threats in the scene. Know your target and what lies beyond it. Shoot-throughs on non-threats count against you.

Starting position is at the low ready.

At the buzzer you engage the first target with two rounds (double tap) **FROM RETENTION.** Then engage the second target with two rounds to the body and one to the head. The second target is not from retention. Again, watch your fire zone.

Scoring will use the IDPA method of points down and time.

The above drawing is not to scale.
